The California Department of Resources Recycling and Recovery (CalRecycle), acting as the solid waste Enforcement Agency (EA) for the City of Stockton, will be holding this public information meeting to consider a new SWFP for the construction and operation of a transfer/processing facility at the Port of Stockton. The facility will receive and process whole wooden railroad ties; urban “green” wood waste and other non-construction wood debris; and pre-ground wood material. All material will be classified as non-hazardous waste. The ground railroad ties and the urban green wood waste will be sold as fuel material.

On March 15, 2016, the EA accepted the application for a new SWFP submitted by RSL Operating, Inc. The EA’s preliminary determination is that the new SWFP conforms to the Transfer/Processing Report, dated February 2016, completed for the facility. A copy of the application and supporting documentation are available for public review during regular business hours at the EA’s office located at 1001 I Street, Sacramento, CA 95814 by contacting the EA as provided above.

The public information meeting is for any interested parties to provide comments on the EA’s proposed action for a new SWFP. If you would like to comment on this project you may do so at the meeting or you may send your written comments to the EA as provided above.

For information on the appeals process pursuant to Public Resources Code Section 44307 after the decision to issue or deny the permit revision, you may contact the EA as provided above.
